Experience

Web Developer • JBEI International
San Marcos, CA • Jan 2016 – Dec 2016

- Developed several web applications to assist manager and sales team.
- Redesigned company websites. Built user interface for clients (more info here).
- Work predominantly used AngularJS and PHP.

Projects
- **List Manager • JBEI International • 2016**
    - o AngularJS interface that lists, sorts, and filters through over 600,000 subscribers. Includes edit-in-line, pagination, and performance improvement. Can also parse large CSV/Excel files to bulk import list items and backup on AWS.
    - o Used: HTML5/CSS3/Javascript, jQuery, AngularJS, PHP, MySQL, Bootstrap, SASS
    - o Demo video here
- **Template Manager • JBEI International • 2016**

- o An AngularJS-based UI that navigates through nested folders and tickets. Creates multiple tickets with a predetermined template with a simple drag-and-drop feature to rearrange nested ticket relationships.
- o Used: HTML5/CSS3/Javascript, jQuery, AngularJS, PHP, MySQL, Bootstrap, SASS
- o [Demo video here](#)

- **Schedule Tracker • JBEI International • 2016**
  - o AngularJS interface that tracks the delivery status and tracking data of emails. Can filter by list, status, and date-scheduled. Saves personal preference and last viewed state according to user. Can generate a shareable URL to pass info between users.
  - o Used: HTML5/CSS3/Javascript, jQuery, AngularJS, PHP, MySQL, Bootstrap, SASS
  - o [Demo video here](#)
